SentiLLyzer
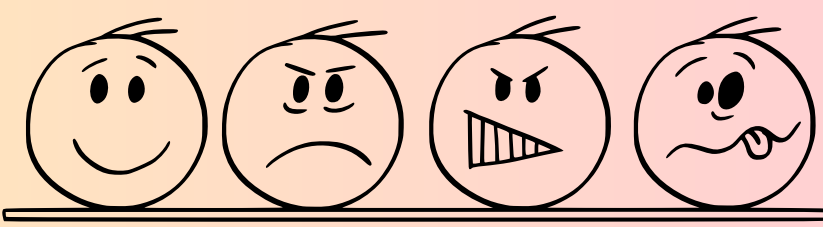

Next-gen sentiment analyzer, powered by AI that gets you!
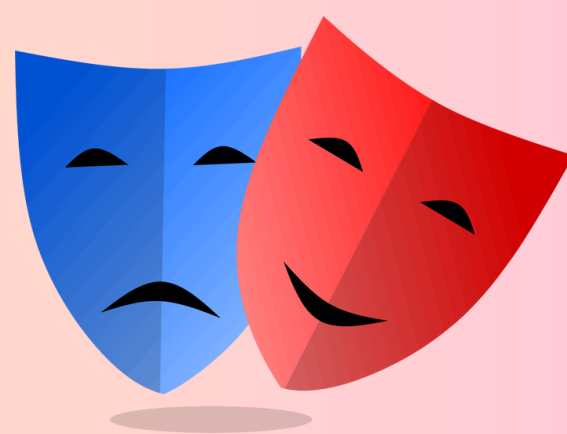

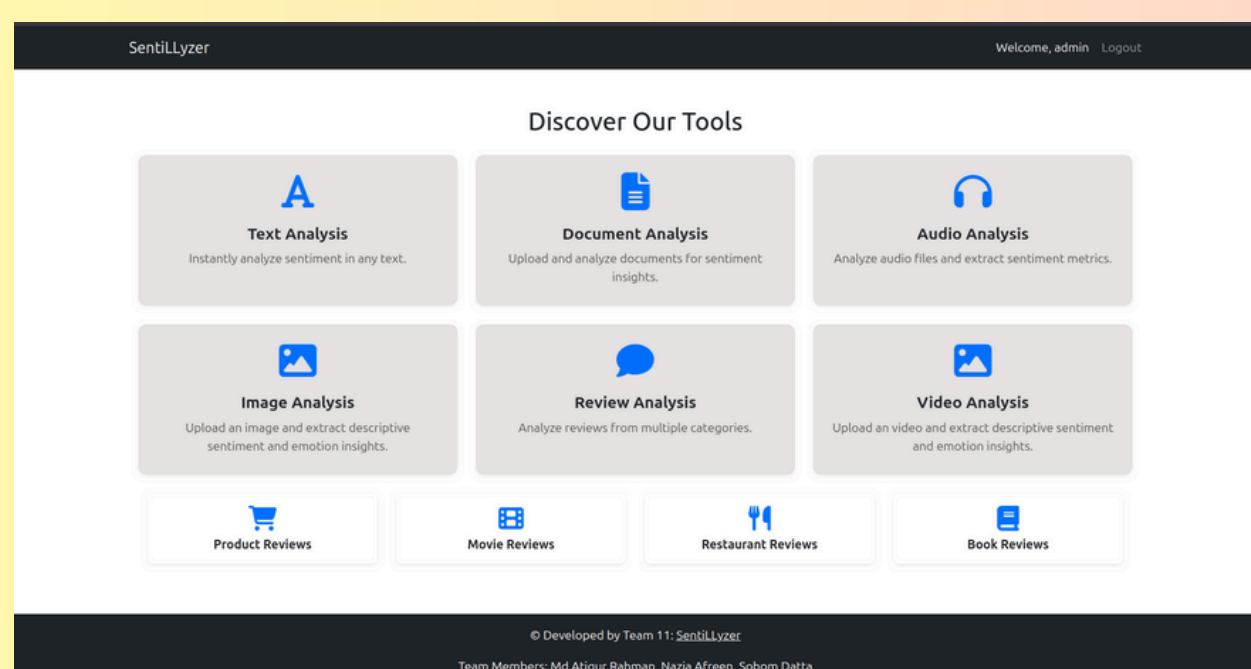

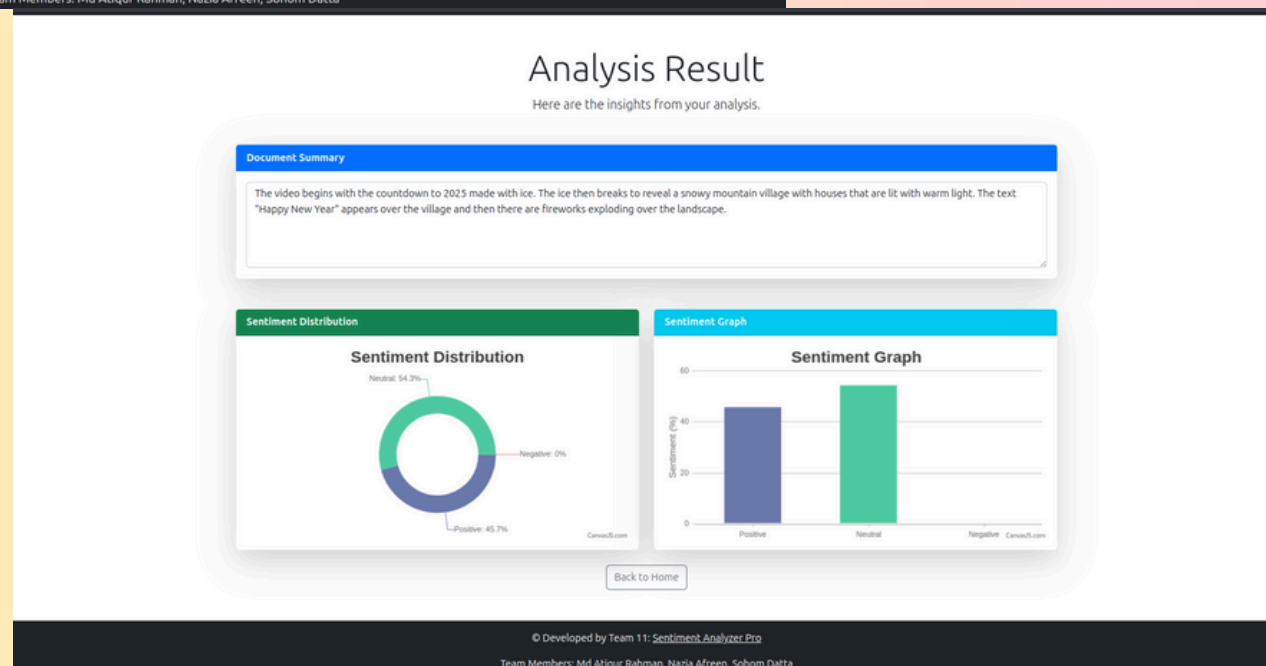

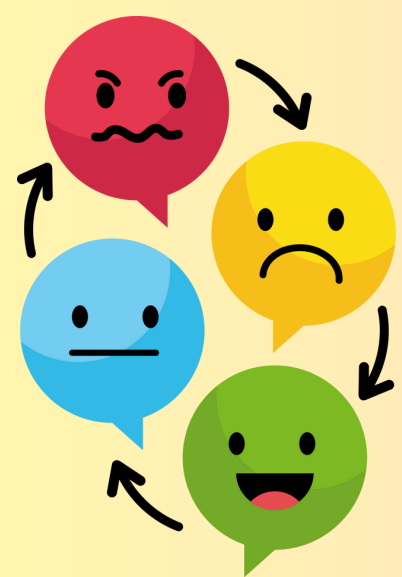

Tired of scrolling through endless reviews to figure out if something's actually good? Whether you're picking a movie, trying a new product, or running your own business — SentiLLyzer has your back. We use cutting-edge LLMs to read the room (or the internet!) across text, audio, video, and images. From product reviews to restaurant rants, we decode the real user sentiment, so you don't have to.

Shoppers get clarity. Businesses get insight. Everyone wins!!!
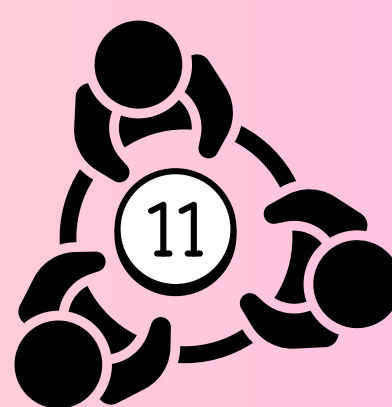

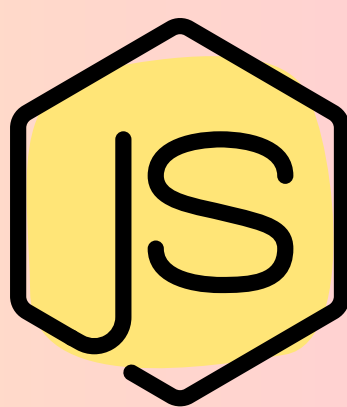

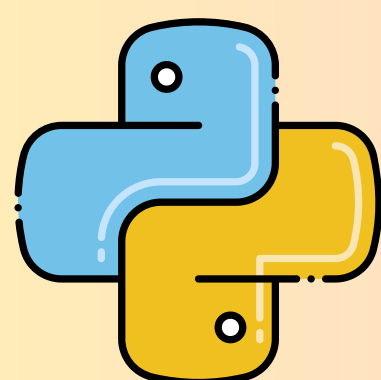

What's new?

- 🧠 **LLM-Powered Intelligence** – Replaced old-school NLP with powerful LLMs for smarter, more accurate sentiment detection.
- 🎙️ **Multi-Modal Magic** – Now understands not just text, but audio and video sentiment too.
- 🌐 **Real-Time Review Scraper** – Pulls fresh reviews from the web to analyze consumer sentiments about products, movies, restaurants, and books.
- ⚡ **Blazing Fast Caching -** Added request and response caching to make repeat queries lightning-fast.
- 💡 **Smarter Insights, Seamless UX** – Revamped the whole system for smoother performance and richer feedback.

FUTURE

- 🌍 **Multi-Language Support** – Expand sentiment analysis to support reviews in multiple languages.
- 📊 **Sentiment Trend Dashboards** – Visualize emotional trends over time for businesses and products.
- 🧩 **API & Plugin Integration** – Offer plug-and-play access for platforms like Shopify, Yelp, and Goodreads.
